

Engineering, procurement and maintenance for Venezuela's energy industry

We deliver construction, supply and maintenance services for oil, petrochemical and power generation operators across the Orinoco Belt and eastern Venezuela.

Clients **PDVSA** **Petrocedeño** **Petrolera Sinovensa** **Corpoelec** **Metro de Caracas**

About us

Multiservicios Proyben, C.A. delivers civil and oilfield construction, steel and concrete structure erection, earthworks, domestic and international procurement, and multidisciplinary project management.

We also carry out feasibility studies and maintenance for the industrial, oil and power generation sectors. Our management and engineering team brings more than 20 years of experience in engineering, procurement and construction projects in Venezuela and abroad.

Headquarters	**Lechería, Anzoátegui State**
Tax ID (RIF)	**J-41198433-7**
Registration	**National Contractors Registry (RNC)**
Qualification	**National, State and Municipal Public Administration**
Quality control	**Independent SGS inspection**

Services

Engineering, procurement and construction
Conceptual and detailed engineering, feasibility studies and EPC projects through to handover.

Construction management
Multidisciplinary projects with schedule, cost and quality control, plus domestic and international logistics.

Rotating equipment maintenance
Vertical, centrifugal, close-coupled and submersible pumps and motors; alignment, balancing and calibration of turbines and compressors.

Electrical and instrumentation
Installation and connection of electrical systems and towers, precision and control instrumentation, and turbine control migrations.

Industrial maintenance
Preventive, corrective and predictive maintenance of static equipment, substations and distribution lines; plant recovery.

Erection and civil works
Steel and concrete structures, earthworks and power line construction.

Oilfield procurement
API pipe, valves, ASTM fittings, PCP pumps and well motors, imported direct from the factory with SGS inspection.

Electrical procurement
34.5 / 0.48 kV transformers, AWG and URD cable, AAAC conductor, insulators, reclosers and sectionalisers.

Quality control from origin to destination

1. **Supplier selection.** Factories qualified against international standards.
2. **Factory inspection.** Representative samples tested before dispatch.
3. **SGS certification.** Independent verification before shipment.
4. **Port inspection.** Final verification at origin and destination.

Direct factory procurement

China	Manufacturing and supplies
Canada	Extraction equipment
Mexico	Industrial components
Germany	Rail and workshop equipment
India	Production supplies

Current contracts with Corpoelec

Supply of spare parts and instrumentation for the maintenance of Venezuela's thermoelectric power plants.

In progress

Procurement of high-turnover consumable spare parts for maintenance of thermoelectric power plants nationwide

In progress

Procurement of measurement equipment and instruments for predictive, preventive and corrective maintenance of thermoelectric generating units

Completed projects

Client	Scope	Discipline
PDVSA	Petcoke mobilisation from the alternate yards of the José Antonio Anzoátegui Industrial Complex	Logistics and site works
Petrolera Sinovensa	International procurement of J55 and N80 oil country tubular goods	Procurement
Petrolera Sinovensa	Procurement of electrical, mechanical and instrumentation products for a tank and flare	Procurement
Petrocedeño	Restoration of PCP artificial lift systems in wells with Type III completions	Maintenance
Petrocedeño	Migration of the main station turbine control system from Mark V to Mark VIe	Electrical and instrumentation
Petrocedeño, South Area	Integrated maintenance of turbine generators, electrical substations and distribution lines	Electrical maintenance
Petrocedeño, South Area	Preventive, corrective and predictive maintenance of rotating and static equipment and instrumentation	Maintenance
Petrocedeño	Equipment recovery at the upgrader's delayed coker unit	Maintenance
Petrocedeño	Supply and installation of new and refurbished transformers	Electrical
Metro de Caracas	Services to switch machine, traction and AC generation motors for trains	Electrical maintenance

Brands we supply

YOKOGAWA	SHINKAWA	Young & Franklin	FLUKE	Honeywell
Instrumentation and process control	Vibration monitoring for rotating machinery	Valves and actuators for gas turbines	Electrical test and measurement instruments	Process automation and safety

Supplied through authorised distributors in Venezuela, with an installed base at complexes such as Metor, Pequiven and Super Octanos. **Rail partner:** SIM Impex GmbH (Berlin, Germany).

Operational capacity. Proyben's yard, warehouses, generators, heavy machinery and crane fleet in Anzoátegui.
